

Ritesh Mishra

Front-End (ReactJs) Developer

I am a Front-End (ReactJs) Developer. Learned front-end development from Sweden-based coding School, Scrimba. Enthusiastic about developing scalable web applications and working across the front-end part. Designed dynamic and interactive web pages using HTML5, CSS(Flexbox, Grid), JS. Developed projects and landing pages from zero to deployment. Excited to learn more technologies and work with great teams.

- Essential JavaScript Concepts
- Next-level Javascript
- Building apps with Flexbox and Grid
- React (basics + advanced)

Master of Arts Kanpur University

04/2020 - 07/2022

Courses

- Political Science

PERSONAL PROJECTS

User Admin System (10/2022 - 10/2022)

- Solo Project
- It is a responsive website made using ReactJs.
- Used Context API and hooks.
- Used FileStack for image uploading and retrieve functionality.
- States are used to integrate data b/w various pages.
- User have logging in and signup functionality
- Form Validation.
- Used JSON server as backend

Personal Dashboard (Javascript) (05/2022 - 05/2022)

- It is Chrome Extension used as a default page in Chrome.
- Uses APIs to get current time, date, current rate of dogecoin, user address and temperature in the region.

PicSome (ReactJs) (07/2022 - 07/2022)

- It is a Image shopping app. User has option to add images to the cart and favourite them. Used API to fetch images and React router to navigate between pages.

Tenzies Game (ReactJs) (06/2022 - 06/2022)

- This is a SPA classic game Tenzies. Users have to choose the same numbers each time they roll and when they get all 10 die with the same face, the user wins the game.

Meme-Generator (ReactJs) (06/2022 - 06/2022)

- It is a Meme-Generator React application. It uses API to get JSON data (Collections of Images) and randomly display one image on the screen. Users have two inputs to insert text on the top and bottom of the image and generate the meme.

Travel Journal (ReactJs) (05/2022 - 05/2022)

- Made using ReactJs
- Journal of various places of India.

BBQ- Landing Page (Javascript) (05/2022 - 05/2022)

- It is a responsive web page with a JavaScript form. I have used flexbox and media queries to make it responsive for all sets of screens.
